

Higher Biology Looks After the Environment

Mrs Gater's S5 Biology class recently wrote to local MSP Keith Brown about alternative fuel sources. They provided an excellent argument about the demand for an eco-friendly fuel source and explored the very positive effects of using biogas, exploring if it was a possible sustainable source for the future. Keith Brown wrote back saying that he is pleased they are learning about renewable energy and that it is, in fact, already a part of the Scottish Government's plans. This is very positive news about a very worthy cause and it is excellent to see our young students engaging in such positive socio-political issues.

School Show: 'Hairspray' – auditions!

Dunblane High School are currently holding auditions for their next school show, Hairspray. Many pupils are hoping to be a part of the school show this year and are all very excited. Good luck to everyone auditioning this week for what will be an exciting and enriching cultural experience!

Did you hear?

Dunblane High School's FABULOUS News Team is back and better than ever!!!

Over these past few weeks Dunblane High School has been working on a brand new magazine. We are hoping to publish once every term and the magazine will contain everything people want to hear about including...Interviews with staff and pupils, Horoscopes and lots more.

Not only do we want to say a big thank you to Miss Smith, our editor, but we also want to welcome our new S1s to the team.

European Languages Day

Well done to our Languages team and pupils and staff across the school who contributed to our cross-curricular celebration for National Languages day last Monday. Pupils took part in a whole-school quiz and decorated the school in international colours for the day as well as speaking in a range of European languages.
